OBJECTIVE

Software Engineer with strong foundations in Java, Spring Framework, SQL, and Full Stack Development. Experienced in developing web and mobile applications using Java, React Native, and modern development tools. Passionate about building scalable software solutions, solving complex problems, and contributing to high-performing engineering teams.

EDUCATION

B.Tech in Computer Science and Business Systems	2020 – 2024
Sri Manakula Vinayagar Engineering College, Puducherry	CGPA: 7.03

WORK EXPERIENCE

Software Developer	Nov 2025 – Jan 2026
JK Global IT Solutions	<i>Chennai, India</i>

- Developed and maintained multiple client websites, web applications, and business solutions using React.js, HTML, CSS, JavaScript, Node.js, Java, and Firebase.
- Contributed to the development of a Hotel Booking Engine, implementing responsive user interfaces, booking workflows, API integrations, and backend functionalities.
- Collaborated with designers, project managers, and clients to deliver scalable and user-friendly web applications.
- Improved application performance, user experience, and maintainability through code optimization and reusable component development.
- Participated in full software development lifecycle activities including requirement gathering, development, testing, deployment, and maintenance.

SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL

Backend Technologies: Core Java, Advanced Java, JDBC, Servlets, Spring Framework, Spring Boot, REST APIs

Frontend Technologies: HTML5, CSS3, JavaScript, React.js, React Native

Database: MySQL, PostgreSQL, SQLite, Firebase, Supabase, PocketBase, MongoDB

Concepts: OOPs, Collections Framework, Stream API, Exception Handling, Multithreading, MVC Architecture, Data Structures and Algorithms

Tools & Platforms: Git, GitHub, Android Studio, VS Code, Postman, Expo

CERTIFICATES

Microsoft Certified: Azure Fundamentals click 	May 16, 2023
AWS Cloud Practitioner Essentials click 	May 09, 2023
Microsoft Certified: Power Platform Fundamentals click 	May 11, 2023
Python Basics for Data Science click 	June 20, 2022
Introduction to Cloud Development with HTML, CSS, and JavaScript click 	March 23, 2022
Android App Developer click 	April 15, 2023

PROJECTS

CLINIC FLOW – DIGITAL PRESCRIPTION AND CLINIC MANAGEMENT SYSTEM (Client Project)

React.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

Designed and developed a tablet-optimized clinic management platform for a real-world healthcare practice. Implemented patient registration, visit tracking, vitals management, queue monitoring, and digital prescription workflows. Built a custom handwriting engine with Apple Pencil support, pressure-sensitive stroke rendering, prescription history management, and secure cloud-based data storage using Supabase.

INFO VIEW – Educational Communication Platform (College Mini Project)

Java, MySQL, Android Studio

Developed an Android application to improve communication between students, parents, and faculty members. The platform enables users to receive academic announcements, internship opportunities, hackathon notifications, placement updates, and other important educational information through a centralized system.

BEHAVIORAL BIOMETRIC AUTHENTICATION (Final Year Project)

Java, Machine Learning

Developed a behavior-based authentication system that analyzes keystroke dynamics, mouse movements, and user interaction patterns using machine learning techniques. The solution enhances security for devices and online transactions by continuously validating user identity based on behavioral characteristics.
